📣 **Build Week – Weekly Plan**

Dear Students,

This week will focus on **Project Building, Mock Interviews, Project Presentation, and Revision Sessions** to help you strengthen your technical skills and prepare for upcoming opportunities.

📅 1. Tomorrow – Project Walkthrough Meeting

🕐 **Time:** 12:00 PM

- A project walkthrough meeting will be conducted to explain the project and clarify your doubts.
- Prepare all your questions related to the project beforehand.
- **Form a group of 3 members before 10:00 AM tomorrow.**

💻 2. Project Building

- Work on building your project throughout the week.
- Focus on implementation, problem-solving, debugging, and applying the concepts learned.
- Use the project walkthrough meeting to clarify your doubts and understand the project requirements.

🎯 3. Mock Interviews

- Mock interviews will be conducted throughout the week.
- The interview slots and schedule will be shared with you shortly.
- Be prepared for questions related to Python, NumPy, Pandas, SQL, and your project.
- Students who are unable to complete their mock interviews this week will be accommodated in the next Build Week.

📚 4. Daily Revision Sessions

Revision sessions will be conducted every day on the following subjects:

- Python
- NumPy
- Pandas
- SQL

The day-wise revision schedule will be shared with you tomorrow.

🎤 5. Saturday – Project Presentation

- **Project Presentation:** Students will present their projects on Saturday. Be prepared to explain your problem statement, approach, implementation, and outcomes.

Please plan your week accordingly, actively participate in all sessions, and make consistent progress on your projects.

Note : Mock Interview, Project building, Project Presentation all this is graded.

All the best for Build Week! 🚀
